

PRESS RELEASE

BALZER'S CANADA INC. CONTRACTS CLEVOR TO PROVIDE SCHEDULING SERVICES FOR THEIR PIPING FABRICATION PROJECT FOR PCS LANIGAN POTASH MINE

Saskatoon, Saskatchewan, June 12, 2007 – Clevor Technologies Inc. announces that Balzer's Canada Inc. has contracted Clevor Technologies Inc. to provide them with scheduling services for the piping fabrication project they are undertaking for PCS Lanigan Potash Mine Rehabilitation.

The project involves the fabrication of over 500 piping spools with different delivery dates. Clevor will build a resource loaded optimized schedule and will provide periodic update and re-optimization of the schedule for the full duration of the project. It is expected that later on Balzer's Canada Services will license Clevor's technology so that they can use this technology to serve all their customers in the future.

Ravi Maithel, President of Clevor Technologies Inc. said, "We are very happy about this contract. We believe that we will be able to assist Balzer's project team manage this project better both by meeting tight schedules under the conditions of resource and other constraints while minimizing their cost of the project. We also hope that this will lead Balzer's Canada licensing our technology for this shop.

Dwayne Currie, Vice President Operations of Balzer's Canada Services said, "We are expecting Clevor help us execute this project by optimizing the deployment of our resources and enable us to meet the very tight schedule required by our customer. This should enable us to control our costs while improving our customer service"

About Balzer's Canada Inc. Balzer's Canada Inc. is a Canadian Company that specializes in Industrial Construction, Process Equipment & Piping Systems, Plant Maintenance, Water and Waste Water Treatment Plants.

About Clevor Technologies Inc. Clevor Technologies Inc. has developed and markets Clevor Schedule Optimizer for construction companies, maintenance operations, manufacturers and professional services companies. Clevor Schedule Optimizer represents a true breakthrough in scheduling technology. It automatically builds a schedule that "optimizes" a given business objective. These software tools use a patent-pending intelligent systems-based high performance optimization engine developed by Clevor. These solutions provide a compelling value for their users.
