

PRESS RELEASE

ALTO AWARDS SECOND CONTRACT TO CLEVOR

Saskatoon, Saskatchewan, September 9th, 2004 – Clevor Technologies Inc. announces that ALTO Construction Ltd. has awarded it a second contract to provide the scheduling services for its work related to the PCS Rocanville Potash Mine Expansion. This project work started at the beginning of this month. Clevor is already providing scheduling services to Alto Construction for their earlier contract at PCS Rocanville.

Ravi Maithel, President of Clevor Technologies Inc. said, "We are grateful for the award of the second contract by ALTO. We believe that this will lead to a much better control of this project by ALTO and to satisfaction by their customers. We also hope that this will lead to further contracts from ALTO."

Ron Kunkel, President of ALTO Construction said, "We have had a very good experience working with Clevor on the first project. Their software has made it easier for us to control the project and adjust the resources to meet the needs of the project. Our customers have expressed their satisfaction with the way the project has progressed. We believe that having Clevor's scheduling capability gave us an edge in this second project."

About ALTO Construction Ltd.

ALTO Construction Ltd. is a Saskatchewan based company formed in 1969. During the over thirty-four-year history of the company, ALTO projects have encompassed industrial plant construction, and their ongoing maintenance and operations. Other projects have included the dismantling of complete mine plants or specific items, such as head frames, grinding mills and power plants.

About Clevor Technologies Inc.

Clevor Technologies Inc. has developed and markets a suite of Schedule Optimizer software tools for construction companies, professional services companies and manufacturers. Clevor Schedule Optimizers build a schedule that "optimizes" a given business objective. These software tools use a patent-pending intelligent systems-based high performance optimization engine developed by Clevor. These solutions help build a significant competitive advantage for its users.
